# **Montana DNRC Program for Selling Timber By Weight** Challenges of **Conversion and Valuation** Presented by: Sarah Lyngholm

#### **Presentation Overview**

- Background and History
- SOP for Measurement and Valuation
- Positives vs. Risks
- Future Opportunities

# **DNRC** Forest Management

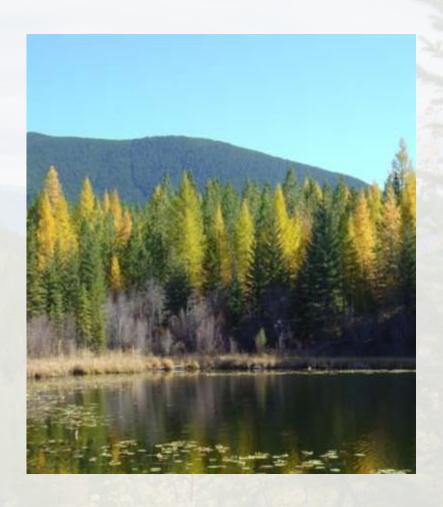

- ~ 730,000 acres of forested School Trust Lands
- Fund education through timber sales
- 57.6 MMBF Annual Sale Target
- ~\$10 million annual revenue

# **History**

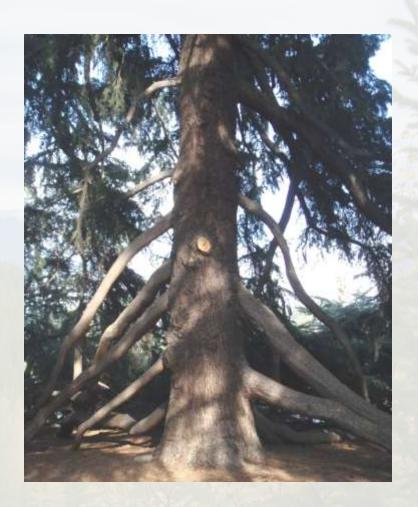

- Sold primarily by MBF
- 1995 Sustainable Yield
- Late 1990s: switched from selling by MBF to tons
  - Consistent metric
  - Small diameter material
  - Simple accounting
  - Save scaling cost

# **Cruising**

- Standard field procedure
- MT Cruiser
- Champion tariffs
- Ft³ Volume → Tons
  - Long term averages by species

# **Assumptions**

- Log weight correlates to volume
- Montana is homogenous
  - Geography
  - Temporal

# **Appraisal** → **Minimum** bid price

- Transactions evidence
- Location
- Diameter
- Stand density
- Harvest system
- Index prices
- Costs to purchaser

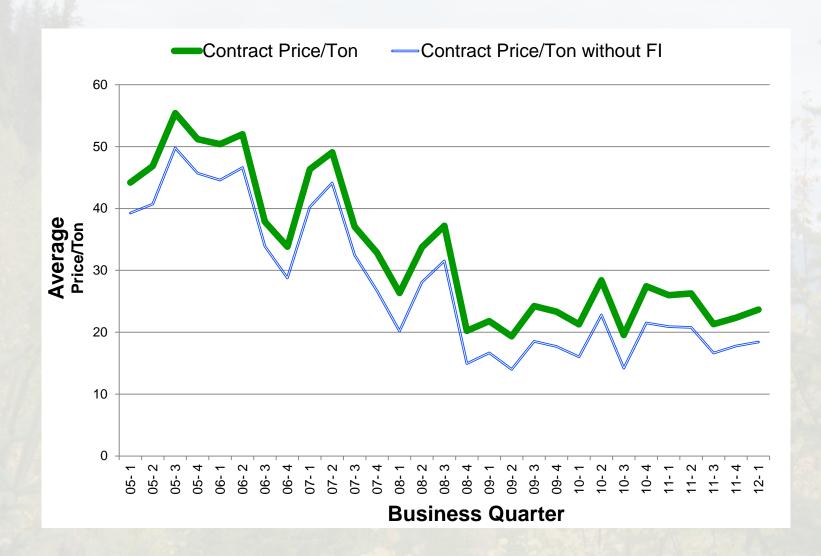

# **Bidding**

- 30 day ad
- Sealed bids
- Disclaimers
- 1 no-bid sale in 12 months

#### **Contract**

- Specifications
  - Utilization
  - Weight ticket requirements
  - Schedule

#### **Positives**

- Easy measurement
- Easy accounting
- Consistent with industry
- Cost savings

#### **Positive**

 Purchaser pays for everything they haul

#### Risk

 Purchaser pays for everything they haul

#### **Risks**

- DNRC
  - Full value from bidders?
- Purchaser
  - Good information from DNRC?

# **Challenges with Conversion**

- Variation
  - Season
  - Manufacture
  - Age
  - Size
  - Defect

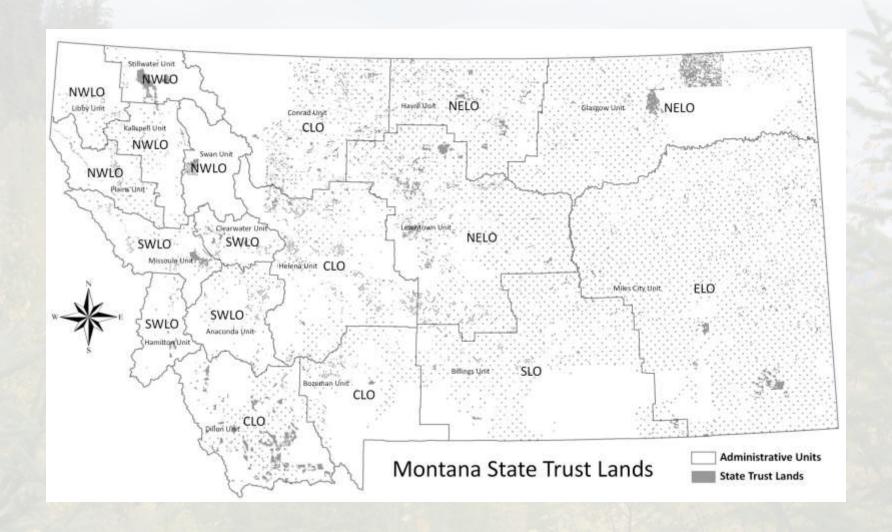

# **Challenges**

- Salvage
- Climate
- Old growth
- Variation around State

# **Challenges**

- Small diameters
- Special products

# **Challenges**

- Utilization
- Administration
- Lost expertise
- Quality

# How are we doing?

- Underrun
  - By tons
  - By MBF?
- Why?
  - Cruising?
  - Utilization?
  - Timber Character?

# Why do we care?

- Sustainable Yield Target
  - \$\$ for the school children
  - Long term growth
- Customers Needs
  - Planning
  - Appraisal
  - Consistency

# **Trust Land Revenues by Program**

Resource Program	201	1 Revenue
Agriculture and Grazing	\$	20,714,158
Forest Management	\$	10,496,231
Real Estate Management	\$	3,245,037
Minerals Management	\$	41,781,055
Recreational Use	\$	1,043,707
Land Management Revenue	\$	77,280,188

### **Future Expectations**

- Scaling study –
  adjust cruise
  program?
- Sustainable yield
  - Ft<sup>3</sup>? M<sup>3</sup>?
  - MBF and Tons?
  - Biomass?
- Tailored sales

#### **Conclusion**

- Purchasers prefer consistency over accuracy
- Everyone benefits from shared information
- Changes based on systematic assessment

# **Montana DNRC Questions?**
